

Welcome to TinyVoice Twins! 🦁

Hi! I've been building an app for early speech therapy — it's all about sound-first learning through real photos, warm spoken voices, and playful games.

WHAT IT IS

A mobile app designed for toddlers to explore 7 living worlds, learn new words, play listening games, and have fun with turn-taking. No emoji, no scores — just warmth and real sounds.

WHAT I NEED FROM YOU

1. Try it out — load the app on any device (phone, tablet, laptop) and explore with Ethan
2. Play for a session or two — tap into the worlds, listen to the words, check out the games
3. Share feedback — there's a quick form at the end (or anytime via the Parent Dashboard)
4. Tell me what you notice — what works? What's confusing? What would make it better?

Some features are still being built, so rough edges are expected — that's what testing is for!

READY TO TRY IT?

Open the app here: <https://tiny-language-app.vercel.app/>

Then follow the Quick Start Guide for step-by-step instructions.

Thanks for helping! 🎉
